

Foreign trade statistics: raw data by domain

01.01.2022

In addition to the [Swiss-Impex](#) database, raw data deliveries are also available, generally to be uploaded in a database. Each product contains import and export raw data for selected areas, as well as its metadata (denominated country codes, groups of goods, etc.). You find below practical information and a description of available products:

Format	txt (DOS/UNIX)
Periodicity	monthly or annual data
Delivery type	single or periodic delivery (monthly, quarterly or annually)
Price	See price list
Transmission	per e-mail or file transfer
Contact	stat@bazg.admin.ch / 058 462 66 10

Tariff number (TN400)

The *tariff number* product includes imports and exports (available from 1988) in terms of quantity and value, broken down by the eight-digit numbers of the [Swiss customs tariff \(Harmonized System\)](#) and by country of origin (country of production until 2011) or country of destination.

SITC (CT400)

The *SITC* product includes imports and exports (available from 1988) in terms of quantity and value, broken down by the [SITC](#) nomenclature (*Standard International Trade Classification*), by country of origin (country of production until 2011) or country of destination.

NST2007 / Mode of transport (VT400)

The *Mode of transport* product includes imports and exports (available from 1988) in terms of quantity and value, broken down by the [NST2007](#) (*Standard Goods Classification for Transport Statistics* from 2007; NST/R until 2006), by country of origin (country of production until 2011) or country of destination, border crossing territories and by mode of transport.

Processing traffic, re-exports and re-imports (TN404)

The *processing traffic, re-exports and re-imports* product includes only imports and exports (available from 2002) of processing traffic (contracting or for own account) as well as re-exports and re-imports (returned goods). The results are broken down, in terms of quantity and value, by the eight-digit numbers of the [Swiss customs tariff](#), by customs procedure code, by country of origin (country of production until 2011) or country of destination.

Metadata (ST400)

This product contains the metadata, i.e. the codes and texts (German, French and English) relating to the different classifications (groups of goods, countries, continents and country groups, supplementary units, modes of transports, etc.), necessary for the interpretation of raw data.
